2. HAZARDS IDENTIFICATION

DANGER. CORROSIVE. Causes severe skin burns and eye damage. Harmful if inhaled. May cause kidney and liver damage May effect the central nervous system (CNS). Side effects include dizziness, drunkenness, coughing, eye irritation, and loss of consciousness. Avoid repeated contact or breathing in vapors. Ethylene glycol monobutyl ether (also known as 2-butoxyethanol) is a possible teratogen. CAUTION: Contains an ingredient that may affect the Central Nervous System (CNS), causing dizziness, headache, or nausea. May cause damage to organs through prolonged or repeated contact.

Hazard Classification: Skin and Eye Category 1: Corrosive

Acute Toxicity Category 4

Aspiration Category 1

Potential Health Effects

EYE:

Corrosive to eyes.

SKIN:

Causes severe skin burns and eye damage.

INGESTION:

May cause nausea, vomiting and stomach irritation. This product if swallowed, can cause severe burns and tissue perforation. May be harmful if swallowed and enters airways.

INHALATION:

Prolonged inhalation may result in respiratory irritation. Under normal conditions, using adequate ventilation no problems are expected. Excessive inhalation may irritate the mucous membranes and the respiratory tract. If inhaled in high concentrations, vapors may be corrosive. Causes burns to the respiratory tract. May be harmful if inhaled. May cause respiratory irritation.

CHRONIC (CANCER) INFORMATION:

Not listed by IARC or NTP as a carcinogen. Long term exposure via inhalation of concentrations of 2-butoxyethanol up to 125 ppm caused an increase of liver tumors in male mice. A slight increase in adrenal tumors was observed in female rats. The NTP has determined that 2-butoxyethanol displays some evidence of carcinogenicity in female rats. The IARC has evaluated the material as an IARC Group 3 not classified as to carcinogenicity in humans, based on limited data in animals and inadequate data in humans.

Carbon dioxide, dry chemical, or water. Avoid using a direct stream of water. Dry chemical, foam, carbon dioxide, water fog. Use water to cool fire-exposed containers and to protect personnel.

FIREFIGHTING INSTRUCTIONS:

Wear appropriate and suitable protective clothing and breathing equipment for the situation. Follow NFPA Fire Protection Guidelines. Use self-contained breathing apparatus.

6. ACCIDENTAL RELEASE MEASURES

SMALL SPILL:

Use appropriate containment to avoid run-off. Keep out of streams, sewers and waterways. Collect free material. Absorb remainder on inert absorbant. Wash area with plenty of water.

LARGE SPILL:

If possible, clean up spill area with an absorbant and then flush with plenty of water. Absorb liquid with vermiculite, floor absorbent or other absorbent material. Keep out of sewer, streams, ponds, lakes, or other waterways.

7. HANDLING AND STORAGE

HANDLING:

Concentrate is corrosive to all body tissues. Containers, even those that have been emptied, will retain product residue and vapor and should be handled as if they were full. Do not eat, drink or smoke in areas where this material is used. After handling, always wash hands thoroughly with soap and water. Do not handle near heat, sparks or flames. Use only with adequate ventilation/personal protection. Avoid contact with eyes, skin or clothing.

STORAGE:

Keep containers covered. Take the usual chemicals handling precautions. Avoid contact with eyes, skin and clothing. Wear appropriate protective equipment. Wash thoroughly after handling. Do not take internally. Keep out of reach of children. Do not contaminate food or water by storage or disposal. Keep containers closed when not in use. Store in original containers.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS:

When used as directed, no engineering controls are necessary. If used in an confined space and excess material is used, a source of ventilation may be required.
